INTRODUCTION

This Volume 8 of the Royal Jordanian Stud Book contains those horses registered and entered in the years 2008-2016, together with some late registrations omitted from the previous combined R.J.S.B. Volume 6 & 7.

Since our last volume was published, there has been a continuing revival of interest in Arabian horse breeding in the Kingdom of Jordan. Once again, we have seen marked increase in the number of imports and exports in the period covered by this volume, from many countries, and a consequent increase in the number of private breeders with Supervised Studs, and of owners who take part in the many activities available for Arabian horses in the country. In this volume, we are therefore following the format as used in Volume 6 & 7. We have also added ISO codes of the country of birth for all imported horses, for the interest of stud book users.

All Broodmares with Produce entered in this volume are listed alphabetically by name, and the foals are shown underneath each mare's entry with the data arranged as follows:-

Year of birth	Colour, Sex	Name of foal	Name of Sire	Name of Breeder
---------------	-------------	--------------	--------------	-----------------

The protocol used in R.J.S.B. is that the named breeder of each foal is the owner of the dam at the time of the foal's birth.

All Sires with Progeny entered in this volume are also listed alphabetically by name, and the foals are shown underneath each stallion's entry with the data arranged as follows:-

Year of birth	Name of foal	Colour, Sex	Name of Dam
---------------	--------------	-------------	-------------

If a stallion is domiciled overseas, as in the case of imports in utero and foals that are produced by the use of imported semen, the sign **§** is used after the stallion's name and country of birth ISO Code, to denote that the particular stallion is not registered in R.J.S.B.
