## INTRODUCTION

This Volume 9 of the Royal Jordanian Stud Book contains those horses registered and entered in the years 2017-2019, together with some late registrations omitted from the previous volume 5, the combined R.J.S.B. Volume 6&7 and from Volume 8 .

Since our last volume was published, there has been a continuing revival of interest in Arabian horse breeding in the Kingdom of Jordan. Once again, we have seen marked increase in the number of imports and exports in the period covered by this volume, from many countries, and a consequent increase in the number of private breeders with Supervised Studs, and of owners who take part in the many activities available for Arabian horses in the country. In this volume, we are therefore following the format as used in the previous two Volumes. We have also added ISO codes of the country of birth for all first generation imported horses with foals entered in this volume, for the interest of stud book users.

All Broodmares with Produce entered in this volume are listed alphabetically by name, and the foals are shown underneath each mare's entry with the data arranged as follows:-

Year	Colour, Sex	Foal Name	Sire Name	Breeder
------	-------------	-----------	-----------	---------

The protocol used in R.J.S.B. is that the named breeder of each foal is the owner of the dam at the time of the foal's birth. Embryo Transfer is permitted, so in the case that a mare has two foals born in the same year, one of them may be an ET foal.

All Sires with Progeny entered in this volume are also listed alphabetically by name, and the foals are shown underneath each stallion's entry with the data arranged as follows:-

Year	Foal Name	Colour, Sex	Dam Name
------	-----------	-------------	----------

If a stallion is domiciled overseas, as in the case of imports in utero and foals that are produced by the use of imported semen, the symbol **§** is used after the stallion's name and country of birth ISO Code, to denote that the particular stallion is not registered in R.J.S.B.

Foals imported in utero are shown under their sires and dams with the notation (i.i.u.) after the name, they are not additionally shown in the Imported horses sections of this volume.
